Microsoft C E R T I F I E D

Solutions Developer

Web Applications

Objective/ Contributions/Achievements:

- To make concrete and substantial contribution in the growth of organization and upgrade my knowledge and skills
- Full stack developer with 5+ years of experience
- Microsoft Certified Solution Developer(MCSD)
- Well Versed in Microsoft technologies (ASP.NET, MVC, C#, SQL Server, WCF, webAPI, entity framework), HTML, CSS and different JS frameworks : Angular JS, EXT JS, D3 JS
- Worked as Business Analyst(BA) and Lead Developer for different projects (Client : United Nations) as well as internal projects
- Experience in complete SDLC and Agile framework with expertise in Software Development by using various technologies and methodologies
- Implemented Data Visualization with D3.js, AM Charts
- Actively involved in all project planning, designing activities with the client and proactively provided best solutions
- Dedicated, Energetic, competitive achiever who can inspire and motivate team members
- Good verbal and written communication, Team and Analytical skills
- Participated and Won awards in various sports(Baseball,Softball,Football,Kho-Kho) and represented state at national level

Professional Skill Set:

Programming Languages	C, C++, C#.NET
Web Technologies	HTML5, CSS, JavaScript, jQuery, ASP .NET, D3 JS, Angular JS, EXT JS
Frameworks	MVC, WCF, entity, webAPI
Database Management System	SQL Server
Other Tools	IIS, VSS, NUnit, FxCop, VSTO, TFS

Professional Experience:

5+ Years of experience.
Senior Software Engineer at **Trigyn Technologies Ltd.**
Mumbai May (2012) – Till Date

Certification:

Developing ASP.NET MVC 4 Web Applications (70-486)

Programming in C# (70-483)
Developing Microsoft Azure and Web Services (70-487)
Project:

Client:	United Nations
Project:	gDoc - Global Document Management
Role:	Full stack Developer

Project Description:

gDoc is application to manage the documents for conferences held at United Nations offices worldwide. Application handles document submission, translation, printing and distribution.

Technology Used:

ASP.NET 4.5, SQL SERVER 2012, TFS, llblGen, EXT JS, webAPI

Project:

Client:	UNICEF
Project:	Fund remittance management (FRM)
Role:	Lead Developer

Project Description:

The purpose of the FRM application is to provide PFP and NatComs with an online tool to remit/manage/monitor/approve funds received from its private sector donors. Additionally, the FRM application's workflow will be utilized by PFP to process these funds from the private sector to UNICEF`s General Ledger (Vision) making them available to be used by UNICEF globally as well as by Country Offices. Finally, the data collected via the FRM application will be exported to PFP's new Business Intelligence (BI) Environment to meet analysis and reporting needs for both PFP and NatComs.

Technology Used:

ASP.NET 4.5, SQL SERVER 2012, TFS, EF 6.0, Dev Express Control Library

Project:

Client:	UNICEF
Project:	POST
Role:	Lead Developer

Project Description:

The new post application is to provide UNICEF PFP with an online tool to manage/monitor/report on post structure and changes. The post application will regulate PFP Funded Posts and OR Funded Posts using the different Business Areas. The Business Area acts as a username and a location for the different posts, for example, Business Area 5750 corresponds to Geneva, so each business area has its own user. Finally, the data collected via the application will be needed to generate reports within the application and will also be exported to PFP's data repository for other reporting purposes.

Technology Used:

Angular JS, Web API, D3JS, Entity Framework

Project:

Client:	OCHA
Project:	OCHA Account Management (OAM)
Role:	Lead Developer

Project Description:

OAM is a web application which synchronizes the data of different OCHA account like UNDP,

EIDMS, and JPO etc. The application allows the user to upload user information and based on that information application link the data of different accounts based on their match key. This helps the HR to identify and synchronize the user account which is present in the different data source and accounts.

Technology Used:

ASP.NET4.5, MVC4, Entity Framework 6.0, Angular js SQL Server 2008, jQuery, JavaScript, CSS, bootstrap, Aspose

Project:

Client:	United Nations
Project:	UN Data Visualization
Role:	Full stack Developer

Project Description:

This project seeks to help improve the UN system's capacity to visualize UN System-wide program and management data to the public and senior management.

Data Visualization is the output of related processes, including Big Data, Business Intelligence, and Open Data. While the project will inevitably rely on gains made in related areas (such as the adoption of universal data and standards), the focus remains data visualization and the necessary steps to improve the UN system's collective capacity in this specific area.

Technology Used:

HTML, CSS, D3.JS , JavaScript, Jquery, Cross filter.js DC.JS, SVG

Project:

Client:	OCHA
Project:	Single One
Role:	Developer

Project Description:

Single One is the generic web authentication site which is used by other OCHA sites for their authentication. All OCHA sites are redirected to single one for authentication and after successful authentication single one redirects the user to their main site.

Technology Used:

ASP.NET2.0, VB.NET, Web Service, LDAP, SQL Server 2008

Project:

Client:	Trigyn Technologies
Project:	Resume Minor
Role:	Developer

Project Description:

Resume minor is used to upload the candidate information directly from resume with the help of add-ins. Resume minor is a very helpful tool in recruitment activity. When recruiter screening some resume and if recruiter feels that candidate is suitable for the position then he/she can directly upload that resume and information related to a candidate in the database.

Technology Used:

ASP.NET 4.0, C#, VSTO, Ajax, MS SQL Server 2008.

Project:

Client:	Trigyn Technologies
Project:	Resource Management System (RMS)
Role:	Lead Developer

Project Description:

RMS is a Web-based recruitment and applicant tracking solution that streamlines and automates a three-step recruitment and hiring process. Hiring Management, Resume Management, Process Management, all three steps being administered seamlessly through one integrated application.

Technology Used:

Asp.net (.Net 4.0), C#.NET, Jquery, JavaScript Ajax, MS SQL Server2000, NUnit, FxCop.

Academic Profile:

- B.E. with first division**, Computer Science& Engineering,** Mahakal Institute of Technology**, Ujjain (M.P.), affiliated to** Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal**.**

- HSC and SSC**, Lokmanya Tilak, Higher Secondary School, Ujjain, affiliated to** M.P. Board**.**

Degree	Year of Passing	Percentage (%)
B.E [CSE]	2011	69.53
HSC (12th)	2007	64.44
SSC (10th)	2005	76.2

Awards and Achievements:

- Selected as a **Sports Secretary** of the College.
- Participated in **National level Football** competition as a member of RGTU Team (West zone) held at Goa in 2007.
- Participated in Kho-Kho at State level as a captain of the team in the year 2009 held in Jabalpur and in the year 2010 held in Ujjain.

Personal Details:

Father's Name	Mr. Rafique Khan
Date of Birth	13/05/1990
Nationality	Indian
Present Address	D4-35, Green Fields Society, JVLR , Andheri(E), Mumbai (M.H.)
Hobbies	Playing Baseball, Softball, Football, Kho-Kho, Singing

I hereby declare that, to the best of my knowledge and belief, the particulars were given above and the information therein is true.
